

## CNS June 2008 Press Releases and Announcements

### New Canadian North Sea Energy Website

Canadian North Sea Energy Limited (CNS) is excited to announce the release of its new website:

[www.canadiannorthsea.com](http://www.canadiannorthsea.com)

The website is intended to provide information on the company to the general public, and, via password protected areas, to shareholders and to CNS's management and staff. The website will grow in tandem with the growth and progress of the company.

### New Appointments to Canadian North Sea Energy's Board

Canadian North Sea Energy Limited (CNS) is delighted to announce the appointments of two new directors to CNS's Board: John Lander and Peter Griffiths. John and Peter both joined CNS's Board with effect from March 2008. Brief biographies are provided below.

#### **John Lander**

*Non-Executive Chairman*

#### **Professional Profile**

- 26 years experience as director of independent UK energy companies.
- Non-Executive Chairman of Alkane Energy plc.
- Managing Director of Tullow Oil North Sea 2000 to 2004 during period of exceptional growth for the company.
- Managing Director of Pict Petroleum.
- Board Director of Premier Oil, British Borneo, Tusker Resources, RTZ Oil & Gas.
- Started career as geophysicist with Shell.

#### **Peter Griffiths**

*Technical Director*

#### **Professional Profile**

- 35 years experience in oil & gas, in technical and geoscience management positions, in North Sea and internationally.
- Last 8 years as Geoscience Director of RML/Senergy, Board member and major shareholder; responsible for setting company strategy and developing/delivering the business plan.
- Consultant geoscientist, with Talisman Energy, Monument Oil & Gas, TRACS International.
- 23 years as geoscientist with BP, with increasing responsibility and experience in North Sea, Ecuador, Australia, Canada, Gabon and Turkey.

CNS is an early-stage North Sea Energy focused company with a high growth strategy. The focus of this strategy is to unlock value from appraisal and development assets, using a phased approach and resulting in timely oil and gas production.
